

Xtreme-Marine[®]

Subsea SDI/HD Video Coax

Application

Subsea video coaxial cables are designed for marine applications from 200m to 7km depth ratings. These coaxial designs are capable of HD video, when properly terminated, with varied length capabilities. "Xtreme-Marine[®] HD" coax designs can be ordered single coax with Polyurethane jacket or designed into any custom subsea cable construction, adding power & control conductors, strength layers, armoring or Neutral buoyant constructions.

Cable Properties	Conductors:	Stranded copper for longer flex life.
	Dielectric:	Solid PE blend with 90C rating.
	Shields:	Braided tin copper 95% +Alm tape.
	Jackets:	Inner jacket of TPE with good IR to water. Outer Jacket of Xtreme-Grade PUR 90C rated, with short term to 110C.

PART NUMBER	COAX TYPE	MAX DEPTH	AWG (STR)	Z ₀ IMP.	DIELECTRIC DIA.	SHLD OD BRD DIA.	INNER JKT DIA.	XPUR FIN. DIA.

* This preliminary product data release is under engineering review and values are subject to change before official Release. Attenuation values are based on BNC/ TNC type terminations, using best procedural control with lowest VSWR results.
